Every Kind

Vol. 5, No. 34

Carbon, Alberta, Thursday, Sept. 22nd, 1927

\$2.00 a Year

LITTLE ITEMS OF LOCAL INTEREST

Mr. and Mrs. Geo. Malton and Mrs. H. Willson motored to Calgary on Tuesday and returned the same day.

S. J. Garrett was a business visitor in Calgary on Tuesday.

Alex Reid went into Calgary on Monday to bring out a new Moon car.

Bert. Wright, who has been spending the summer at his home here, leaves on Tuesday for Edmonton, where he will again attend the University of Alberta.

P.W. Rouleau, district manager of the Ontario Equitable Life Insurance Co., of Calgary, was a visitor in town on Monday.

T. R. Olive has his threshing outfit in operation and commenced threshing Mike Robinson's grain on Tuesday.

Mr. Hoading, formerly of Carbon and now of Vancouver, was a visitor in town on Monday.

Mr. and Mrs. L. Poxon, Mr. and Mrs. H. Brue, and Harry Evans and Victor Hawkins were visitors to Pine Lake on Sunday.

—FOR SALE—Dining room suite, consisting of Buffet, table and six chairs.—Apply to Mrs. H. C. Wilson, Carbon.

Jas. Clayton of Calgary, who has been looking after his business interests in this district for the past week, left for his home in the city on Saturday.

Miss Bessie Cunningham returned on Saturday after spending the last two weeks visiting with friends in Wayne.

Commencing last Sunday, a bus line between Carbon and Calgary was started. The bus leaves Carbon every morning at 8 a.m. and arrives in Calgary at 11.15 a.m. Returning, it leaves Calgary at 5 p.m. and arrives in Carbon at 8.15.

Miss Mae Williams returned last Friday from her holidays.

Mr. and Mrs. R. Barr and Miss Peirie returned to Carbon on Saturday after spending the past two months on a motor tour in Eastern Canada and States points. They report a very pleasant and interesting trip.

Percy Edwards, A.F. McKibbin, J.A. MacDonald and J. J. Greenan motored to Calgary Sunday and as delegates from the Board of Trade, they interviewed the Superintendent of the Bank of Montreal regarding the building of a new bank in

THE SHOOTING STARS

The enormous increase in the sport of deer hunting has resulted not in the vanishing of the deer but in the increase of deer. This is not as mysterious as it sounds. The more men penetrate the wilds the fewer wolves remain. The driving out of wolves has been the greatest factor in the increase of deer. But there is another factor almost as important as the wolves. The invasion of the backwoods by an army of enlightened sportsmen has demanded a much stricter and more sporting regard for game laws than was the custom some years ago. Destroyers of deer whether human or animal, have to deal with a strong and more or less organized public opinion.

Good Hunting News

Reassuring news has been coming in daily to the offices of the general tourist department of the Canadian Pacific Railway Company from operators of camps, guides, outfitters and others who report that all signs point to an unusually promising hunting season for the current year.

Carbon. Although no definite promise was made, the Superintendent intimated that it was the Bank's intention to construct a building here in the spring.

Fred Poxon made two trips on Tuesday and Wednesday, taking over Mrs. R. McGregor's furniture to Hussar, where Mr. McGregor is managing the Hussar hotel.

If your subscription is in arrears pay up and help keep the newspaper going. The label on your paper will tell the tale.

With fine weather prevailing the past few days, cutting in the Carbon district has practically been completed and the crops are about ready to be threshed. Threshing commenced the beginning of the week and if the fine weather continues it will not be long before all the machines in the district are at work.

J. A. Connolly, our local school principal, has traded in his Ford on a new Moon coupe, and we understand that he is now looking for a companion to occupy the seat beside him. Well, Joe, the chances should be good. The country is full of the "sweat young things."

A dollar stays away in direct proportion to the distance sent away; that sent far stays long; that kept here abides in the community, fareing forth to the butcher, the baker, the gas distributor, the garage man etc. and so on it again finds its way back to the laborer, artisan, professional man or whoever it was that first spent it in the community.

BOOTS FOR HARVEST

Urus Calf, waterproof, per pair,	\$3.90
Elk, farm proof, best quality, per pair,	\$3.75
Choc Cowhide, heavy, per pair,	\$3.45
Choc Cowhide, lighter weight but not split leather, pair	\$2.90

W. A. BRAISHER

Hunting Army to Invade North Woods

Mike Bates sends down word from his camps at Metagama, Ontario, that if the hunters don't get their deer and moose this season they'll have nothing to blame but their poor shooting. He says that moose are very plentiful and expects it to be a great year in every way.

From Schreiber Ontario where John Handel, outfitter has been operating the reports are just as reassuring. Handel reports that the game has increased in the Superior Game Re-

ports turned in by guides of the Ogilvie Bros. Camps on the Tobique River, N.B. are to the effect that deer, though very plentiful last season, show signs of much greater increase. The same word comes from A. D. Thomas, at South Milford in the Kedgemakooche district.

Lining Sights.

Should you follow the deer with your sights or set your sights ahead of the deer and let him come on them?

Well, the army training which men got overseas taught them to consider the second system the better. Lewis gunners firing on moving targets were taught to throw a burst ahead of the mark, to see where it struck, and then let the target move onto the line of fire. Trying to follow a jumping deer in all its excited movement is harder, probably, than trying to guess a spot that the deer will pass—say an opening in the brush on which to have time to lay your sights sharp and true. For casual shooters to get a little practice with their rifles a method of letting the deer run on sights already set is regarded as the most successful.

CALLING THE MOOSE

serve, south of the C.P.R. line and the surplus has crossed to the north of the tracks offering good hunting. He says that caribou are roaming the woods in increased numbers, and as the C.P.R. line is the north boundary of the game preserve hunters don't have to go very far for their quarry.

The news from Sheehan's camp at Lake Penage south west of Sudbury is also music to the hunters ears. Deer here are reported to be very plentiful and sport should be excellent.

TO THE VICTOR THE SPOILS

Swalwell

Mr. S. R. Tilley is again back on the job after a two months holiday, which was spent in travel.

Mr. and Mrs. Earl Tricker motored to Delacour on Sunday and visited friends there. They returned on Monday.

We understand that Mr. and Mrs. Okel Meyers are returning to this part of the country. Okel having secured the job as second man in the new Pool Elevator.

Mrs. Shreeve with Margaret and Mildred, of Trochu, spent Sunday in town.

Workmen are busy putting in a new air dump at the U.G.G. elevator so as to be ready to receive their share of the new crop.

Messrs. Archie Webster and F. Curry arrived this week to look after their interests in this year's crop.

On a visit to her daughter, Mrs. Jean Fraser is spending a week or so at Jasper.

With a new staff, the Royal Hotel is now ready to receive all comers.

Recent changes in the department of Natural Resources of the Canadian Pacific Railway have been effected. P. L. Naismith who has been manager of that office since 1912 tendered his resignation, whereupon Mr. S. G. Porter will officiate as manager. Mr. Naismith will, however, retain his position as chairman of the Advisory Committee, which he has held for the past two years.

No Canadian agricultural honor has come at a more propitious time than the award of the silver medal "for outstanding excellence" to the Canadian exhibit of tobacco prepared by the tobacco division of the Central Experimental Farm at Ottawa at the Tobacco Exhibition held at Olympia, London, England, in May. The Canadian product came into competition with that of South Africa, North and South Rhodesia, India, Colombia, Italy, Greece and Macedonia, thus consolidating the position previously held by Canada in expert opinion as the producer of the best tobacco in the British Empire.

CARBON CURLING CLUB INCORPORATED

A general meeting of the Carbon Curling Club was held in the Municipal office on Friday evening, September 16th. Mr. Greenan announced that the incorporation papers were now through and it was necessary that new officers be elected.

The following officers were elected for the coming year:

President, J.R.E. Coburn.
Vice-President, J.J. Greenan.
Sec. Treasurer, R. J. Fairbairn.
Chaplain, Rev. C.B. Oakley.
Executive: L. Poxon, Jas. McLeod, A. F. McKibbin, A.H. Jealous and S. F. Torrance.

A full discussion took place in regards to the building of a curling and skating rink this fall and plans and estimates were submitted.

The committee in charge of the canvassing of the town for subscriptions reported that they had collected approximately \$500 from this source.

As it was not possible under the act for the Village to borrow money and issue debentures, as was at first proposed, it was decided to accept a private loan of \$1,000 for the purpose of paying for the erection of the rink, the sum to be repaid at \$200 annually with interest at the rate of 10 per cent.

The executive committee was appointed to interview the School Board in regards to moving the old school from the grounds on which the rink is to be built, and this committee is also to make all arrangements for the building of the rink.

An entertainment committee consisting of J. J. Greenan, J. A. MacDonald and R. J. Fairbairn was appointed to arrange for the best means of raising additional funds by the holding of dances, etc., throughout the winter.

The secretary was instructed to write to the secretary of the Swallowell club for the return of the Burns trophy.

CUTTING "DOWN" GRAIN

A plan for cutting "down" grain and which is being carried out with fair success by a local grain grower, is as follows:

Replace the Reel Slats with spruce 2x2. In these bore holes for 6-inch spikes, about one foot apart; flatten heads of spikes to keep them from turning in slot; slightly bend spikes

By handling reel low to front the spikes will lift the "down" grain, greatly assisting the cutting and resulting in better bundles.

When we buy at home our town has both the money and the merchandise. When we send away, our town has only the merchandise.

Did you ever think that there would be no home industries if the people purchased all supplies from outside?

Opportunities For Britain In Canada

Great Britain has a problem and Canada has a problem, one being the exact opposite of the other. In the British Isles there is a surplus population for which employment cannot be found. In Canada there are enormous resources and vast areas of fertile lands which call for increased population in order that development may take place. The Old Land has too many people; this New Land has too few.

Looking at the face of things it would seem to be a comparatively simple matter for the British and Canadian Governments to evolve policies under which the surplus population of Great Britain could be transferred to the open spaces of Canada, thus solving the problems of both countries. But the solution is not so easy, in fact, it is most complex and difficult.

The class of settlers which Canada wants is the agricultural type, men and women who will go on the land. True, they may not have had actual farming experience to be welcomed and to succeed, but they must be of that class which is likely to make good on the land.

Great Britain, however, has no large surplus of this type. If, indeed, any surplus at all, the British surplus population is found among the workingmen, artisan and labor class, men and women who, because they cannot obtain steady employment, are obliged to accept the Government dole. Opportunities for the employment of any large number of these people in Canadian industry are small, and it would be most unfair to them to encourage their immigration to Canada where their presence would have an injurious effect on Canadian workers and labor and lead to the creation of a Canadian situation not unlike the present one in Great Britain.

The efforts of both the British and Canadian Governments are, therefore, confined to the training of a limited number of immigrants for agricultural pursuits and the proper placing of them on farms in Canada. Welcome as these efforts are, their effect on the respective British and Canadian problems of surplus and insufficient population is almost negligible.

There would seem to be a greater hope of making an effective contribution towards the solution of this joint problem in the adoption of the idea which has been urged of late, namely, that the great captains in British industry establish branch plants in Canada in order to enable them to successfully compete in the growing Canadian market with their United States rivals and that they staff these branch plants with their own workmen from the British Isles.

The general adoption of such a policy would result in profitable investment of British capital, would lead to a marked development of the natural resources of this Dominion, would help to adjust the balance of trade between Canada and the United States, would add to the population of the Dominion profitably employed, would ease the unemployment situation in the Old Land, and would increase the productive capacity, the prosperity and wealth of the Empire as a whole.

It will be frankly admitted that the Industrial leaders of Great Britain have had to face enormous difficulties during and since the war. The have borne an age still bearing, heavy burdens. They may justly feel that the present is not the time to launch out on new and untired ventures. The situation is, however, that only through the adoption of heroic measures will conditions in the Old Land be bettered, and some relief brought to British industry. Furthermore, under existing conditions, British industries are losing out in the Canadian market. An effort should be made to hold and strengthen their position here before it is too late.

It is gratifying to note that one big British concern has decided on a great undertaking in the Province of Quebec, an announcement has just been made that British financial interests controlling tens of millions of capital have finally concluded arrangements for the utilization of Southern Saskatchewan lignite coal in the carbonizing and briquetting of this fuel on a large commercial scale and will within the next few months invest hundreds of thousands of dollars in the enterprise.

Premier Brownlee of Alberta and Hon. Chas. A. Duening have both been urging the adoption of this branch factory policy upon the British manufacturer, and it is to be hoped that so astute a business man as Premier Stanley Baldwin himself a big manufacturer, will see the advantages to Britain, to Canada, to the Empire, of such a policy, and urge its adoption upon his fellow manufacturers in the British Isles.

Uses 'Plane To Operate Farm

The days when the horse was depended on to conduct the rancher over his domain passed to the era of the automobile a few years ago. And now the auto gives way to the air plane. The pioneer exponent of this trend is Jack Pancher, known as the "flying farmer," because he operates his large wheat farm near Spokane, Wash., by air.

Manitoba's Minerals

Current activities in the mineralized areas in southeastern and north western Manitoba indicate that the province will soon become a steady producer of gold and possibly an important source of copper and zinc.

National Dairy Council

Mr. W. E. Stephen, secretary, announced that the ninth annual meeting of the National Dairy Council of Canada will be held at Toronto, on November 21 and 22 next. A number of questions will be up for discussion of interest to dairymen and dairy manufacturers. The programme will be outlined shortly.

The scales used in weighing diamonds are so delicately poised that the weight of a single eyelash will turn the balance.

With a total population of about 100, Leavenworth, a village in Suffolk has eight inhabitants.

Daily use of Cuticura Soap, assisted by Cuticura Ointment when required, not only soothes and heals unsightly and annoying blemishes and irritations on neck and face, but tends to prevent such conditions. Nothing purer, more economical or more satisfactory than these fragrant emollients.

British-Jap Naval Pact Is Reported

U.S. Informed Secret Agreement Between Nations Has Been Reached

The Washington Post says that word has reached the state department officials from "trustworthy sources" that Great Britain and Japan came to a mutually satisfactory secret understanding regarding future naval supremacy when it finally became apparent the United States would not accept the British program at the recent Geneva conference.

The gist of the secret understanding has not been divulged, the newspaper adds, declaring that it is doubtful if much definite information on its content is available to the officials of the U.S. Government. The newspaper story also says the secret understanding is being discussed behind closed doors by officials here with a view to weighing possible consequences.

On Ladies' Toes Are Sore Corns

Quick sale relief is almost instantaneous if you apply Putnam's Corn Extractor. Shoes won't pinch or hurt any more. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for Putnam's.

Water Power Development

The present recorded water-power resources of the Dominion will permit a turbine installation of 41,700,000 horse-power. The total hydraulic installation up to the end of 1926 throughout the Dominion was 4,556,226 horse-power or less than 11 per cent. of the recorded water-power resources.

GIRLHOOD DANGERS

Come Through a Weakening Of the Blood--A Tonic Is Needed

In their early teens it is quite common for girls to outgrow their strength, and mothers should carefully watch the health of their daughters at this time. It is when the strength is sapped by rapid growth that anaemia develops. The first signs may be noticed by peevishness, languor and headaches. The face grows pale, breathlessness and palpitation become apparent, with low spirits and depression.

Neglected anaemia often leads to a decline, but if you see that your daughter's blood is enriched there need be no cause for anxiety. The finest blood-builder ever discovered is Dr. Williams' Pink Pills. They will build up your girl's health and ensure for her healthy womanhood. In proof of this Mrs. George Justason, Black's Harbor, N.B., says: "I think Dr. Williams' Pink Pills a wonderful medicine. My daughter, Margaret, was in such a badly run down condition that we feared she was going into a decline. Her face was pale, the least exertion would leave her breathless and she suffered from headaches. She had no appetite and lost a lot in weight. Up to the time we began giving her Dr. Williams' Pink Pills, no treatment had helped her. But thanks to the use of this wonderful medicine she is again well and strong, showing no signs of the trouble that had so weakened her."

In all troubles due to weak, watery blood, Dr. Williams' Pink Pills will be found a reliable remedy. Sold by all medicine dealers or sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Good Crops Along H.B. Line

Grain fields equal to those on the prairies were seen at Mile 42, Cormorant Lake, on the Hudson's Bay Railway by J. D. Guild, superintendent of illustration stations for the Dominion experimental farm, who has returned from an inspection trip over the route. He reports that at other points, grain is coming along well except at Mile 81, where cutworms have done considerable damage to vegetables. At Mile 42 there is an excellent stand of flax and pumpkins 45 inches through.

Getting Rid Of Encumbrances

It is related that John Lawrence, who ruled the Punjab seventy years or so ago and who later became Vice-roy of India, used to say that when he came across a young Britisher in the India civil service who was encumbered with a wife and a piano, he hustled him about from one jungle station to another till the young man parted first with the wife and then with the piano.

Drives away pain—Minard's Liniment.

W. N. U. 1697

Would Extend Air Mail Service

United States Government Looks Towards Canada As A Field For Extension

Success of the air mail in the United States has led the government at Washington to look towards Canada as a field for extension of its service. Postmaster-General H. S. New has let it be known that he would welcome applications for air mail service between such points as Minneapolis or St. Paul, Minn., and Winnipeg, Man., where there is a fairly large exchange of mail over a short distance. In fact it is likely that preliminary steps will be taken soon to put in a trial service between these two cities but final action will not be taken until after the international air mail conference in Geneva.

It has been customary for the United States post office to await applications, which usually take the form of petitions, signed by a considerable number of people before establishing new air mail routes. A guarantee of about \$15,000 worth of business on any route is generally considered reasonable to justify opening a route.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy.

Speaks Several Languages

Secretary Of State For The Dominions Finest Linguist In British Cabinet

Mr. L. C. M. S. Amery, the Secretary of State for the Dominions, is unquestionably the finest linguist in the present British Cabinet. He speaks several Oriental dialects as well as European languages.

When in Salonica, Sir George Milne, or "Uncle George" as the C. in C. was invariably called, asked one of his staff officers if he understood modern Greek. The officer replied that he did not, but that he had a good handbook on Greek and also that he knew a man who was supposed to be quick in picking up languages.

So Captain Amery was sent for and presented with the handbook. "Can you get the hang of it by next week?" asked Sir George. "Oh, certainly," was the reply. "You seem very confident," said Sir George. "Well, you see, I wrote it," replied Captain Amery.

Minard's Liniment relieves backache

The White Pine In Canada

The botanical range of the white pine in Canada extends from the Atlantic ocean to the province of Manitoba. It is confined to the region lying south of a line running approximately from the southeast corner of Lake Winnipeg, through Lake Nipigon, along the height of land north of Lake Timiskaming, through Lake St. John to Point de Mots on the St. Lawrence and Cape Breton Island.

About four inches in fifteen minutes is the speed of the speediest bacteria.

A MAN AND HIS DOG

The dog owner needs no mask.
his dog protects him. He can afford
to take people on his dog's valuation.
"Love my dog, love me."
Best of all, the dog-owner is never
lonely in his own home, for he
knows that there is a welcome for
him whenever he returns, and that
if he chooses to sit down at once by
the fire and read without worrying
to give a full account of his day's
experiences the dog will quite un-
derstand and settle contentedly at
his side, knowing that the best
sort of spiritual companionship re-
quires no explanation.—Exchange.

Jones says: "marriage is a fifty-
five proposition," and an old man
in the pool room responded, "that
is right; fifty for this and fifty for
that."

Here and There

Air mail service between Winni-
peg and Fargo, North Dakota, has
been inaugurated and the first mail
for Winnipeg from the United
States arrived recently.

The potato acreage along the
Dominion Atlantic Railway line is
larger than last year and a 40 per
cent. crop increase is looked for.
There will likely be 175,000 barrels
available for export, as compared
with 132,000 last year.

A Barred Plymouth Rock, owned
by the University of Saskatchewan,
has established a new record for the
three Prairie Provinces, laying her
300th egg in her pullet year of
which there is still a month to go.
The world's record for trap-nested
production is held by No. 6, an
Agassiz, B.C. pullet, which laid 351
eggs in 364 days.

Members of the newly-appointed
Saint John Board of Harbor Com-
missioners, headed by Hon. W. E.
Foster, recently concluded a confer-
ence with Canadian Pacific officials
of Montreal in connection with the

British Columbia's farms produced
\$71,362,209 last year; breaking
all records and gaining \$6,208,606
over the previous year, according to
the final figures of the Provincial
Statistician, G. H. Stewart. Lum-
bering leads with agriculture second.

A new world record is set—300
white Leghorn baby chicks arrived
from the University of British
Columbia at Ottawa through the
Canadian Pacific Express Company,
safe, sound, and hungry, all of
them. None had feed or water on
their 3,000 mile journey and none
died or suffered.

If Everybody Did It

Think for a moment what would happen if, even for one week, everybody in town were to shop elsewhere—either in a neighboring town or by mail! Would it not cause consternation, and would not all business houses be very much concerned? They certainly would, and with great reason.

Some Do This Regularly

—And what is the result? Every dollar sent to distant business houses is gone for good as far as that particular district is concerned, and merely serves to build up and maintain some distant town. The local business men are robbed of that circulation of money which during its ramblings might help dozens along the way.

How About Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

King's Job Not Enviable

Everything Mapped Out For Months Ahead Makes Life a Drudgery

There is no doubt that the strain of the daily life of the King and Queen, with every walking hour mapped out for months ahead, is much greater than the public realize.

Everyone connected with the Court comments on the splendid health and spirits which the Queen always enjoys. The King is now and then fatigued, but she is never.

There is no harm in repeating a somewhat pathetic comment of the King on his own drudgery in fulfilling, as he does, so scrupulously and good humoredly, the truly tremendous programme laid almost daily before him. Visiting the Lord Mayor of London the other day, whose life during his year of office is, as everyone knows, a veritable slavery, the King remarked: "You have to do this for twelve months but I have been doing it for sixteen years."

Motor Exhaust Kills Tulips

Famous Dutch Flowers Die In Gardens Of Paris

The famous Tuilleries tulips have bloomed for the last time. They are victims of the exhaust of automobiles in the Rue de Rivoli. The bulbs were presented to the city of Paris by Dutch growers five years ago, and were planted in the Tuilleries Gardens, an ideal setting for their masses of gorgeous colors. But each year they have dwindled and it was found that the prevailing westerly winds blew on to them a low wave of methylite gas from passing automobiles, affording an additional proof of the deleterious effect of the growing number of automobiles on the atmosphere of Paris.

Mr. T. E. McGregor, McLennan, Alta., writes: "Over forty years ago my mother used to give us Dr. Fowler's Extract of Wild Strawberry for diarrhoea and summer complaint. All through the years since then when troubled with an excessive looseness of the bowels I have been accustomed to take a few doses of the same old, reliable remedy and it always seems to have the desired effect, no matter what the cause."

"The wonder metal of the age" is a fitting term for Aluminum. Its lightness, brightness, freedom from rust, and many other good qualities, make it a container par excellence for good tea. Red Rose Tea is packed only in this modern metal package.

SUNDAY SCHOOL LESSON

SEPTEMBER 11

SOLOMON DEDICATES THE TEMPLE

Golden Text: "I was glad when they said unto me, let us go unto the house of Jehovah."—Psalm 122:1.

Lesson: 1 Kings 8.

Devotional Reading: Psalm 122.

Explanations and Comments

1. The Great Procession With the Ark and the Tabernacle, verses 1-5. It was during the Feast of Tabernacles, which began on the fifteenth of the seventh month and lasted seven days (Lev. 23:34), that the elders of Israel and all the heads of the tribes brought up the ark of the covenant out of the city of David, which is Zion. "Both the House of Commons and the House of Lords were present, as we would put it, for the elders were the chosen representatives of the people, and the princes of the fathers' houses" were the hereditary leaders. In addition there was a vast attendance of the rank and file" (R. C. Gille). Two processions advanced from different directions. One came from Gibeon and bore the sacred tabernacle with its goat's-hair covering and boards of acacia wood, and all its holy vessels—the brazen altar, the golden candlesticks, the table of show-bread, and the brazen serpent. On Mount Zion this procession joined the other which bore the ark away from its temporary tent erected for it in Jerusalem by David. As the two processions proceeded to the temple, Solomon and a great congregation with him sacrificed a host of sheep and oxen. "The road was flooded with the streams of blood. The air was darkened and scented with the clouds of incense; the songs and dances were unintermittent. Onward the procession moved up the slope on the hill. It entered court after court of the temple. It reached the Holy Place" (Stanley). By this lavish sacrifice Solomon was honoring God in the best way known in those days. It was a primitive method of saying that king and people set no limits to the honor they would show Jehovah.

"There is something repulsive to us in this circumstance, but there is a noble side to such garishness of slaughter. Barbaric it was, but devotional also. Before we blame them, we have to be ready to give as freely in our purified, higher way to the service and worship of God." R. C. Gille.

A Power Of Its Own. Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Mining Men Go To Europe

Will Investigate Treatment Of Coal For By-Products In Germany

Hon. Charles Stewart, minister of mines, and Dr. Charles Camstell, deputy minister have sailed for Europe. Mr. Stewart is one of the Canadian Government representatives to the League of Nations conference at Geneva.

After the sessions of the League he and Dr. Camstell will visit many of the industrial centres of Germany and England for the purpose of investigating the progress made in the past few years in the treatment of lignite and bituminous coal for by-products in Germany.

Producers in Germany claim that they can secure oil from coal at a less cost to them than crude oil.

Witness Centenary Celebrations

P. Ashby and C. E. King, from Uxbridge, England, returning home on the Cunard liner Ausonia from Montreal, after a visit to Uxbridge, Mass., where they witnessed the centenary celebrations, and Uxbridge, Ont.

Make the Penalty Fit the Crime

Proposal Made That Whipping Be Added To Jail Sentence For Stealing Cars

Whipping with a strap persons convicted of theft of motor cars is one of the amendments to the criminal code proposed in the report of the Canadian Bar Association's committee on administration of justice.

The report was presented to the association at its annual meeting by Judge E. Coatsworth of Toronto.

Judge Coatsworth urged immediate legislation by the Dominion and provincial parliaments to incorporate into the criminal code the important amendments suggested in the committee's report.

Concerning the penalties for auto theft the committee recommended that instead of the present one year sentence provided by the code, the penalty be two months' imprisonment with a whipping in the second month with a strap instead of a cat-o-nine tails.

The committee also advised provincial legislation for supervision of persons let out on suspended sentence; for a system of parole, and for "effective dealing" with all the feeble minded and mentally afflicted both when in court and in confinement.

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

The farthest north radio station in the world is one just established by the Soviet government on Cape Desire, in the Arctic Zone. It is intended for communication with Arctic explorers.

A blush is one of the few things that cannot be counterfeited.

Pains in the Back

ANTI-SMUGGLING PLANS DISCUSSED AT WASHINGTON

Washington.—The Royal Canadian Customs Commission left for home after holding four formal meetings and several informal meetings with state, customs, coastguard and prohibition authorities here. It was permitted to look into the workings of the United States anti-smuggling machinery. It investigated the efficacy of the United States customs system in general and three or four branches of the system in particular. It received some suggestions from the United States authorities for improvement of conditions along the border. The commission will take all these things into consideration while it is preparing its reports to the Canadian Government after the close of the Ottawa sittings.

The commission while in Washington confined itself strictly to inquiry into procedure in the United States and any negotiations for a change in existing agreements between Canada and the United States will be instituted later on by the governments themselves.

Little information has been given out as to what actually happened at the conference here, but in unofficial talks with newspapermen, United States officials have let it be known that they are working towards tightening up of the 1924 anti-smuggling treaty between Canada and the United States.

Assistant Secretary of the Treasury, Seymour Lowman, in charge of customs and coastguard patrols, announced that the border patrols would be increased from 200 to 400 men in the Buffalo-Lake Huron district, and prophesied that the United States would greatly increase the number of its coastguard vessels on the Great Lakes if the smuggling of liquor by this route continues.

It is known that United States would like Canada to establish her own consular agents in this country. The commission no doubt has been told that this would make it easier to prevent smuggling both ways and that consular certificates would go far toward minimizing fraudulent invoicing and double invoicing, which methods are now being used to cheat the Canadian Government of revenue.

Noted Explorer Is Slain

Reported That Members Of German Expedition To Interior Of China Are Massacred

New York.—The New York World says Dr. Wilhelm Fiehner, former staff officer of the Imperial German Army and noted explorer, and all of the members of an expedition he was leading, have been reported massacred by natives of the western part of Szechuan province, China.

The World's wireless station picked up a German trans-oceanic wireless press message to the effect that a British resident of Sikkim in the northern part of India, just south of Tibet, had reported that Fiehner and his party had been killed.

New Laying Record

Saskatchewan Barred Plymouth Rock Hen Is New Champion

Saskatoon.—A Barred Plymouth Rock hen owned by the University of Saskatchewan has made a new record for egg production.

Completing her pullet year, this new champion has to her credit a total of 339 eggs in 365 days. Not only is this a new record for Barred Plymouth Rocks, but as far as is known it is a new record for all heavy breeds of poultry.

This bird was bred and raised by the poultry department of the University. She is known as H.3403.

Poultry Congress a Success

Ottawa.—It is now stated by those who had charge, that the third World's Poultry Congress, held in Ottawa from July 27 to August 4, was a greater success than even its genuine promoters predicted. Forty-two countries sent delegates and 1,400 birds numbering 10,000. There were birds from the poultry farms of King George, the Prince of Wales and various reigning monarchs of Europe.

Popularity Of Lindbergh

Seven Million Dollars Involved In Business Offers Since He Made Famous Flight

New York.—Charles A. Lindbergh can have \$1,000,000 by going through a real marriage ceremony in front of a movie camera and \$6,000,000 more by accepting the business offers tendered him since he made his non-stop trans-Atlantic flight, says Commander Fitzhugh Green, the lone eagle's chief secretary, in a popular Science Monthly.

Commander Green, who has completed a check up on mail and other communications to Lindbergh, says that among the 3,500,000 letters and 100,000 telegrams and cables received, were at least three proposals that the young flier join in an attempt to reach the moon by rocket shot from the earth. Lindbergh also received thousands of proposals of marriage. The aviator's mail included also 14,000 packages.

Lindbergh poems, sent in his mail, numbered 5,000 and upwards of \$10,000 was received in return postage. More than 500 "close relatives" asked him to "do something for them." More letters came from women than from men and letters from girls outnumbered those from boys four to one.

Col. Lindbergh answered many of the letters in longhand, but thousands round their way to the waste basket.

New Doukhobor Leader

Son Of Former Leader Leaving Russia For Canada

Yorkton.—Peter Verigin, new leader of the Doukhobors, second son of the former leader of the Doukhobors, in Canada, leaves Moscow September 2, for this country, according to word received by a prominent member of the Doukhobor colony near Yorkton.

He will sail from Southampton on the Berengaria for New York September 10. Permission for Mr. Verigin to leave Russia was extremely difficult to secure from the Soviet Government. Negotiations to this end have been under way ever since the death of his father in a railway accident two years ago, and many obstacles had to be overcome. Mr. Verigin will be accompanied by Paul Ivanovich Birukoff as travelling companion.

Makes Altitude Record

French Aviator Attains Height Never Before Reached By Man

Paris.—Aviators intent on breaking the world's altitude record must climb higher than 42,651 feet in consequence of the feat of Jean Calizo who topped his own record by almost 1,700 feet. Calizo's former altitude record was 12,442 metres and the new mark is 13,000 metres.

"Never again. I don't want to fall off the earth," exclaimed the diminutive Frenchman when informed that he had attained a height never before reached by a human being.

Would Control Flights

Washington.—Rigid control of all future trans-oceanic air flights will be insisted upon by the National Aeronautic Association which announced that while it disclaimed any desire to discourage "individual initiative in the quest for new records" it would demand fitness of flying equipment and competence of personnel as indispensable conditions to sanctioning such flights.

Sugar Industry For B.C.

New Westminster, B.C.—Arrangements for the establishment of a beet sugar industry in the Fraser Valley by an English company, capitalized at \$2,000,000, have been completed, according to word received by the New Westminster Board of Trade.

The company will acquire a large area in the Fraser Valley worked by English and Scotch labor. The plant, it is believed, will be located in New Westminster.

Drink More Milk

Minneapolis.—Mrs. Ella Boole, Brooklyn, was re-elected president of the National Women's Christian Temperance Union, in annual convention here. Milk drinking has increased 27 per cent and ice cream consumption also has gained since prohibition went into effect, said Miss Ephraim Marshall, Chicago, in an address before the convention.

GOOD CROP NOW BEING GARNERED IN PRAIRIE WEST

Ottawa.—Canada is in a fair way to garner another good crop, says a review issued by the Department of Agriculture based on reports submitted by the superintendents of the Dominion Experimental Farms. The survey includes wheat, coarse grains, potatoes, hay and forage, apples, tobacco, sugar beet, and turnips and covers all the provinces.

The wheat producing provinces of Western Canada are referred to separately in the review. In Alberta it is stated very heavy yields are indicated in all parts of the province. No frost or rust damage is in evidence. Cutting is well under way in the South and just started in the central part of the province. A bumper crop in the Peace River region is indicated. "In fact," says the report, "the province, as a whole, seems to be ready to harvest a nearly record crop of good quality wheat."

Cutting is general in Southern Saskatchewan, but just beginning in the more Northerly parts according to the review. In Saskatchewan some injury has been done by frost and rust but this is not likely to cause any great damage. On the whole, prospects in Saskatchewan are for a very good crop with yields somewhat above the average. With respect to the Manitoba wheat situation the bulletin states that about 40 per cent of the wheat crop has been cut in the Southern part of the province and promises to be up to average.

In Central Manitoba, the crop is heavy and is being injured to some extent by rust. In the more northerly parts the crop is rather late and may be affected by rust and frost.

The wheat crop in Quebec and Eastern Ontario will be about average, it is stated. In Western Ontario it is considerably better than last year.

Ship Cream To England

Quebec.—The Provincial Department of Agriculture announces that its experiments, conducted in co-operation with the Development Branch, Canadian Pacific Railway, in the shipping of sweet cream to England, comprising four separate consignments, have been entirely successful, the cream arriving in uniformly good condition. Now that the possibility of this new development has been demonstrated it is expected that commercial interests will enter the field.

Human Fly Robs Hotel

Los Angeles, Cal.—A human fly burglar descended from the roof of the hotel at Alexandria by finger and toe holds, entered the room of five sleeping guests through the windows and obtained \$260 in cash and jewelry valued at \$15,000. Detectives said imprints made by fingers and toes in the dust of window ledges were their only clues.

Asked To Appear In Movies
London.—King George and Queen Mary have been asked to appear in a "speaking movie," which will be shown in London this month in connection with the admiralty's full dress film reconstruction of the battles of Coronel and Falkland. The talking pictures are expected to be the sensation of the year.

"Fore" Replaces War Whoops

Were the stoic old chieftains of the past to sit up in their graves and watch this young chief driving from the eight tee on the Banff Golf Course, there is no saying whether they would grunt in disgust or with approval. Chief Big Buffalo, who is seen about to drive, thinks they would be envious and would bemoan their fate at having to sleep on while their grandsons sent whistling drives over stretches that once echoed with their war whoops.

But for all the Indians may have acquired from the modern world, they still retain the charm of their centuries-old customs and dress much to the delight of the thousands of visitors from all parts of the world who holiday annually at the famous mountain resort of Banff.

This unusual photograph was taken on the scenic course that lies near the junction of the Bow and Spray Rivers, just below the Banff Springs Hotel.

Public Opinion Against War

Increased Participation Of the Masses In Peace Movements

Vancouver.—Increased participation of the masses of the people in formulating the attitudes of nations toward each other was given by Sir George Foster, in addressing the Canadian Club here, as one of the forces operating against war. He cited as an example that not long ago war seemed possible between the United States and Mexico, but that immediately the chance of conflict became known people from all parts of the country protested to Washington. He said the history of negotiations before other conflicts showed that decisions were made on the prejudices of a mere handful of people.

"Read the negotiations which occurred before the last war and note the few persons who participated in them," he said.

Sir George spoke on "The New Internationalism." He said the most stupendous accomplishment in all history was the fact that the peoples of 63 nations had formed themselves into an association of nations to devise new methods of carrying on relations.

Complain About History Books

Report Says Text Books Used In Chicago Are Pro-British

Chicago.—Histories used in Chicago public schools were indicated as anti-American, pro-British and "grossly distorted" in an exhaustive report filed with Mayor Thompson.

John J. Gorman, former congressman who was commissioned by the Mayor to investigate the text books, said he found "they omit facts and distort and minimize many of the real characters, events and ideals hitherto held sacred to American history."

The report came fast on the heels of the suspension, under charges of insubordination, of William McAndrew, superintendent of schools, whom Mayor Thompson has assailed as "the stool pigeon of King George" and the instigator of alleged anti-American teaching in the schools.

No Increase In Immigration

Ottawa.—According to the Department of Immigration, June brought 18,052 newcomers to Canada as compared with 12,391 in June of last year—an increase of 48 per cent. The total for the first quarter of the fiscal year was 77,434 compared with 48,403 for the same quarter of 1926—a gain of 60 per cent. Of the June figures 7,272 were British, 2,642 were from the United States and 8,138 from other countries.

Alleged Spies Arrested

Leningrad, Russia.—The political police have arrested an alleged crowd of 26 spies, charged with espionage in behalf of the British intelligence service in Finland. Most of the accused, including several women, hold various positions in the army, navy and civil service institutions, and are alleged to be in charge of a British naval captain with headquarters in Finland.

Report Labor Increase

Data Shows Gain In Prairie Provinces During July

Regina.—The Labor Gazette reports that in the prairie provinces last month the greatest gains in employment were in construction, manufacturing, transportation, service and communications, while longshore (in which the movement was seasonal) showed a decline. Data were compiled from 775 employers with an aggregate staff of 118,556 workers, as against 113,998 in their last report. This increase of 4,558 workers exceeded that registered on July 1, 1926, while the level of employment was higher than on the same date in any other year of the record.

Under Royal Patronage

Calgary.—The Alberta Wheat Pool is now under Royal Patronage, the announcement being made in the current issue of the U.P.A., the official organ of the United Farmers of Alberta. It announces Prof. W. L. Christie, the manager of the E.P. Ranch, on behalf of H.R.H. the Prince of Wales, had signed a pool contract covering 1,000 acres.

Has Population Of Million

Montreal.—In the preface to the annual report of 1926, which has been published and distributed by the city treasurer, are found statistics concerning Montreal which show it to be one of the nine largest cities on the North American Continent with a population of 1,000,000.

Saved Millions For Employers

Detroit, Mich.—James Everett Smith, steel expert of the Ford Motor Company, died Monday after a long illness. Smith saved the company \$26,000,000 in four years by use of a new method to harden steel, according to a statement written by Henry Ford in his autobiography.

Huge Sum For Defense

New York.—The seven year vain struggle to save Saaco and Vanzetti from death in the electric chair entailed expenditure totalling more than \$350,000. Alfonso Feliciano, treasurer and founder of the Boston Defense Committee, announced here.

Thirty per cent of American men and 61.1 per cent of the women are total abstainers, an estimate shows.

Newsprint Industry Expanding In Manitoba When a Second Big Paper Mill Is Mooted

The newsprint industry has long been established and rapidly expanded in all eastern provinces. It sprang up and saw similar growth in British Columbia. Now the forests of the prairie provinces are being called upon to furnish raw material for newsprint demands.

One of the most outstanding recent items of interest in the Canadian newsprint is the application before the Federal Government for a pulpwood berth on the Nelson River in Manitoba, capable of supplying a newsprint mill of 400 tons per day.

This lies contiguous to the Hudson's Bay Railway, being between the Nelson River and Lake Winnipeg, and is the second berth sought in the province of Manitoba. The Manitoba Paper Company already has obtained a berth with 6,000,000 cords of wood on the east side of Lake Winnipeg, and has built a mill at Pine Falls, with a capacity of 300 tons per day, described as the largest enterprise in the province.

A 400-ton-per-day mill, according to experts, will require a berth containing at least 8,000,000 cords of pulpwood. Power for the mill will be obtained from White Mud Falls on the Nelson River, one of the greatest power sites in the Dominion. An option on these falls, it is understood, has been secured by the financial group behind the new pulpwood application. The falls are, in fact, capable of furnishing a great deal more power than the mill will need, and this is expected to be utilized by the growing mining area north and east, and thus further Manitoba's mining development at the same time.

The finding of a second newsprint mill in Manitoba would mean a great deal to the province not only in its intrinsic but also tributary activity. A 300-ton mill would necessitate an outlay of about \$8,000,000, and the development of White Mud Falls would require considerable additional capital. The mill would find employment for two thousand men, and apparently surpass in volume of output any of Manitoba's present industrial enterprises.

This projection draws further forcible attention to the timber possessions of the Prairie Provinces, which in this respect belie their name. The lumber industry has long thrived in all three provinces and its production goes no inconsiderable way to meet domestic requirements. The newsprint industry is rapidly going to them. Manitoba is about 70 per cent wooded, and the province has been estimated to contain 1,920,000 feet of saw timber, or 4,000,000 B.M. In the sister province of Saskatchewan the area actually timbered with merchantable trees is about 750,000 acres. The Province of Alberta is estimated to contain about 21,000,000 feet of saw timber. Altogether the Prairie Provinces contain about 8,000,000 acres of commercial timber lands, and there are in addition large resources of pulpwood upon which no really accurate estimate has been made.

Opening Of The Canadian Rockies To Motorists

Among the long-closed regions of wonder and romance into which a way has at last been found are the Canadian Rockies. Each year the door opens a little farther, until now a good part of the most beautiful section of these glorious ranges is within the motorist's reach. The opening this year of The Kicking Horse Trail, linking up Yoho National Park by motor with the outside world, marks the fulfillment of one more daring engineering conception.

Cafe Has New Idea

There is a roadside cafe near Ponoka, Alta., that offers a new wrinkle in entertainment. The patron who wants a fish dinner and is willing to wait for it is supplied with a pole, line and fly and allowed to catch his own in a small brook that is kept heavily stocked with hungry trout. While the fish are being prepared, he may enjoy a walk through the small town that is operated in connection with the cafe.

Winnipeg Newspaper Union

An Easily Fashioned Frock

Smartly simple is this chic one-piece frock having the modish two-piece effect. The skirt, having an inverted plait at each side seam, is joined to the bodice, and the round neck, belt, and long dart-fitted sleeves are effectively bound. No. 1639 is for misses and small women and is in sizes 16, 18 and 20 years. View A size 18 (36 bust) requires 27 $\frac{1}{2}$ 39-inch, or 2 $\frac{1}{4}$ 54-inch material; View B requires 1 $\frac{1}{4}$ yards 39-inch material for bodice, and 1 $\frac{1}{4}$ yards for skirt. Price 20 cents the pattern.

The designs illustrated in our new Fashion Book are advance styles for the home dressmaker, and the woman or girl who desires to wear garments dependable for taste, simplicity and economy will find her desires fulfilled in our patterns. Price of the book 10 cents the copy.

Great Britain Would Take Canadian Cattle

But Cannot Pay Present Price Says London Man

Great Britain wants Canadian cattle on the hoof as all other cattle markets the world over, except that of Ireland, are closed to her owing to hoof and mouth disease, but she cannot pay Canada's price as it now stands, declared Henry Ridpath, vice-president of the Canadian Chamber of Commerce, London, and special representative in Great Britain of the Pat Burns Co., Calgary, at the Royal Alexandra Hotel, Winnipeg, where he was in conference with Mr. Burns.

Great Britain's requirements in the meat line are approximately 2,000,000 tons per year, half of which she imported last year from the Argentine, Australia and New Zealand in the form of chilled or frozen meat, Mr. Ridpath said.

Owing to the high prices in Canada which are kept up by demand from the United States, the export of live cattle to Great Britain has fallen off from 100,000 head, in 1925, to 5,000 so far this year. Not even carcasses may be brought in from the Continent, Mr. Ridpath said, so strict are the regulations.

No Market For Poor Hay

Notice States U.S. Has Prospect For Record Crop

The Canadian farmers are warned against shipping poor hay to the markets of the United States in a notice issued by the Department of Agriculture. The announcement says:

"The attention of farmers in the hay shipping sections of Canada is drawn to the warning given by the United States Department of Agriculture that shippers make certain of their market before baling and shipping any poor quality hay. The warning should be especially heeded by Canadian farmers who expect to ship hay across the border.

"There is a record hay crop in prospect in the U.S. Present indications are that it will amount to 162,000,000 tons, or 16,000 tons more than last year, and 4,500,000 tons more than in the previous record year of 1924.

"Even last year, when the United States hay supply was the smallest since 1918, the arrivals at markets were fully equal to the demand. This year there will probably be sufficient good hay to fill all requirements and poor hay will find a draggy market."

Before books became so generally used, persons fortunate enough to possess any guarded them closely, often chaining those containing business records to their ledge; thus they became known as "ledgers."

Flattery consists of having your secret opinion of yourself expressed in the language of others.

Agricultural Possibilities Of Hudson Bay Railway Belt Are Now Being Determined

Live Stock Totals

More Horses In Canada In 1926 Than In Previous Years

It is interesting to note from the very comprehensive report of the Director of the Experimental Farm System of Canada for the year ending March 31, 1927, that the rapid progress of motive power has not made any material difference during the last five years in the number of horses in the country. As a matter of fact there appears to have been more horses in Canada in 1926 than there were last year or in 1923, but in 1922 and 1921 the totals ran somewhat higher. Milk cows show an increase in 1926 over every other year, but other cattle show a decrease, the difference between 1922 and last year being no less than 766,159. Sheep show an increase in 1927 over the three preceding years, although fewer than in 1922. Swine are greater in number than in any other year excepting only 1924.

Alberta's Coal Wealth

Greater Than All Known Coal Deposits In Rest Of British Empire

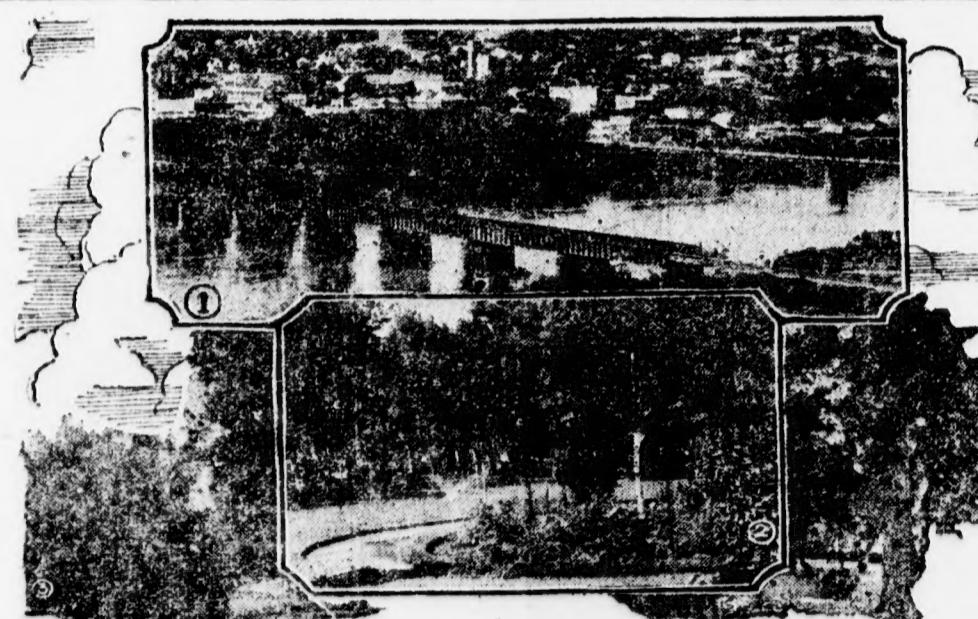

Alberta's potential coal wealth is greater than all the known coal deposits in the rest of the British Empire put together, Sir Thomas Holland, chairman of the Empire mining and metallurgical council, stated at Montreal previous to sailing for home.

"If the present endeavors to change coal into fluid fuel capable of displacing petroleum and all its products are successful, the advantage of the United States in having the richest oil deposits in the world will be killed, and Canada will take the place of the United States as the world's provider of liquid fuel," Sir Thomas said.

Fry Distribution In Manitoba

The Department of Marine and Fisheries announces a distribution of over 72,000,000 white-fish fry from their hatchery at Winnipegosis, Manitoba. This is an increase of more than 21 per cent over last year's figures. The fry were all planted out in good condition on suitable grounds in the lake over a wider area than in any previous year, some of the fry being taken as far north as Whiskey Jack Island in the northern portion of lake Winnipegosis.

The Dominion of Canada was formed in 1867. Today there are sixty-seven languages spoken in the Dominion.

(1) Bridges and Park.

(3) Riverside Park.

(4) C.P.R. Gardens

A City Beautiful in the West

There is general impression when the Canadian West and the prairies are mentioned, of a country flat and uninteresting, covered with miles of wheat in the summer, but otherwise of little aesthetic appeal. When a man stands in this country, he is pleased as the centre point of a circle that stretches without a break of tree, shrub or hill, to the horizon, but the advent of settlers has very

considerably changed what may have been largely true some fifty years ago. The cities that everywhere sprung up—some of them almost over night in consequence of the prosperity of the West, have been designed and built with a view to beauty and the above pictures of parks in Medicine Hat, Alberta, amply bear out this claim. They represent oases of woodland shade in the middle of

the land bare for the most part of trees and they are due to the hand of a man who knows how much they are valued. It is a fine object lesson in what can be successfully done to make beauty flourish where none or little existed prior to the advent of the settler. Medicine Hat is a good example of what beauties of light and shade the cities of the Canadian West possess.

The recent decisions with respect to the completion of the Hudson Bay Railway has led to a number of statements respecting the resources of the territory through which the railway passes and of the country adjacent to it. Very little has been said, however, as to the possibilities for agriculture, but the Federal Department of Agriculture has thought sufficient of the possibilities to recently establish some experimental plots along the line of the railway. Regarding the soil conditions, a report published a couple of years ago by the Natural Resources Intelligence Service, on the general resources of the region, may be of interest in this connection.

It cannot be said, states the report,

that the agricultural future of the

country has been accurately deter-

mined as yet, despite the fact that

success has been met in a small way.

At the same time prospects are by no

means discouraging. The extent of

arable soils is known to be consider-

able; rainfall is sufficient and well

timed; and summer temperatures as

recorded at The Pas and Norway

House are exceedingly favorable to

fast growth and early maturity of

field crops. As far north as Split

Lake the natural flora of the well

drained areas is practically identical

with that of similar ground in the

Riding Mountains 400 miles southwest from Split Lake. Some indica-

tion of the relative surface conditions

prevailing in the belt may be obtained

by examining a cross section of

the country from The Pas northeast

towards Nelson for approximately 350

miles as represented by an examina-

tion of lands adjoining the railway.

Type	Mileage	Per centage
Swamp soils	185	53
Boulder clay	27	8
Lake clay	105	30
Beach sand	3 $\frac{1}{2}$	1
Bedrock outcrop ..	28	6
Total	348$\frac{1}{2}$	100

Soil surveys of this latent agricultural belt have not been attempted except reconnaissance examinations on a limited scale. It has been estimated that a large belt of about 10,000 square miles, the greater part of which lies between the Churchill and Nelson rivers north of mile 130 (H.B. Ry.) and of which 50 to 75 per cent is arable soil, could be made available for mixed farming. This central belt is composed of old interior lake beds whose even textured lacustrine clays have filled the valleys and transformed a broken country into one of more even and undulating topography. The clays are as much as 100 feet deep in places. The soils are all drift material excepting the swamp soils. Ordinarily there is little surface cover as distinct from the subsoil which is low in organic content. Five to twelve inches below the shallow surfacing of decayed leaves and vegetation the clay is found, brown in color from its association with the decayed matter, and quite friable. The swamp deposits on the other hand are composed for the most part of organic material consisting of layers of mosses and other vegetable matter which in the north especially shows little evidence of decomposition or alteration, due largely to the groundice or cold ground-water which prevents oxidation. Much of the clay land is muskeg covered and poorly drained, but these are difficulties which should be overcome with time and forethought and at no great expense. The rainfall is not heavy, the forest cover mostly light and the surface free from boulders, so that little difficulty should be met in draining, clearing or bringing the ground under cultivation.

Copper Deposits In Canada

Copper ores of various kinds, including the native metal are found at many places throughout Canada. Production has so far been confined to the following areas in order of their importance: British Columbia, Ontario, Quebec, Manitoba, and Yukon. Deposits of copper ores are also known in the Maritime Provinces, and in the Arctic regions of Canada. The Arctic deposits, although at present inaccessible, possibly constitute one of the great copper-ore reserves of the future.

...

She: I've just put my firs in cold
storage.He: Oh, is that what they call
it now? My watch and studs are
there too.

...

Dressmaker: Your dress will be
done just as soon as I sew on the
fastener.Flapper: All right, make it snap-
py.

...

Yea, I guess they call it drip
coffee because it trickles off your
chin.

...

Husband: Dinner ready, dear?

Wife: You'll have to wait a bit.
The steak got a little overdone on
the electric stove and I have it in
the icebox now undoing.

...

Little Johnny, a city boy in the
country, for the first time saw the
milking of a cow."Now you know where the milk
comes from, don't you?" asked the
farmer."Sure," replied Johnny. "You
give her some breakfast food and
water and then drain her crank-
case."

...

Wife (to fast driving husband):
Jim, don't go any faster.
Jim: I can't.PATRONAGE DIVIDEND
PAYMENTA payment of one cent per bu-
shel is being made on Patronage

PAY YOUR SUBSCRIPTION NOW

Interest taken by American Rail-
way officials in the latest achieve-
ments in the way of Canadian loco-
motive construction is emphasized
by the fact that the Canadian Pa-
cific Railway Company has been
invited to send their latest and most
powerful passenger engine to be
placed on exhibit at the Centenary
Exhibition and Pageant being held
by the Baltimore and Ohio Railroad
at Baltimore, September 24 to Octo-
ber 8. The C.P.R. "2300" engine,
their latest and finest passenger
type, will be sent to Baltimore.The first ticket issued from the
new Union Station at Toronto over
Canadian Pacific lines was enclosed
in a special leather folder, upon
which appeared the name of His
Royal Highness, the Prince of
Wales. The three tickets following
were issued to H.R.H. Prince
George, Premier Stanley Baldwin
and to Mrs. Baldwin. The new union
station was formally opened by the
Prince of Wales, the Royal train
being the first to steam into the
new depot.A cable received at Ottawa by the
Department of Trade and Commerce
from Harrison Watson, Trade Com-
missioner for Canada in London
indicates that Great Britain will
offer an attractive market for the
Dominion's exportable surplus of
timothy and clover during the pres-
ent year. The cable reads as fol-
lows: "English hay crop turning
out so badly that imported hay will
be required. Prospects are that
there will be a fair demand for
Canadian timothy and clover mix-
ture."
